

Class 10 Java Questions: Loops & Conditional Statements

♦ Section A: Basic Level

1. Write a Java program to print numbers from 1 to 50 using a `for` loop.
 2. Write a program to print all even numbers between 1 and 100 using a loop and `if` condition.
 3. Write a program to print all odd numbers from 1 to 50.
 4. Write a program to print the multiplication table of a given number.
 5. Write a program to count how many numbers between 1 and 100 are divisible by 3.
-

♦ Section B: Moderate Level

1. Write a program to find the sum of all numbers from 1 to N using a loop.
 2. Write a program to find the factorial of a number using a loop.
 3. Write a program to check whether a number is prime or not.
 4. Write a program to reverse a number using a loop.
 5. Write a program to count the number of digits in a number.
-

♦ Section C: Loop + Conditional Combined

1. Write a program to print numbers from 1 to 100, but:
 2. Print "Fizz" if divisible by 3
 3. Print "Buzz" if divisible by 5
 4. Print "FizzBuzz" if divisible by both
5. Write a program to print all numbers between 1 and 100 that are divisible by both 2 and 3.
6. Write a program to find the largest digit in a number.

7. Write a program to check whether a number is a palindrome.
 8. Write a program to print the sum of even and odd numbers separately from 1 to N.
-

◆ Section D: Pattern-Based Questions

1. Print the pattern:

```
1
12
123
1234
12345
```

2. Print the pattern:

```
*****
****
***
**
*
```

3. Print the pattern:

```
1
22
333
4444
55555
```

◆ Section E: Advanced Level

1. Write a program to find the GCD (HCF) of two numbers using loops.
2. Write a program to check whether a number is an Armstrong number.
3. Write a program to print all prime numbers between 1 and 100.
4. Write a program to find the sum of digits of a number until it becomes a single digit.

5. Write a menu-driven program using `do-while` loop:

6. 1 → Check even/odd

7. 2 → Find factorial

8. 3 → Check prime

9. 4 → Exit

 **End of Worksheet**
